**Work Experience**

| | |
|---|---|
| **July 2000- present** | **Intel Mobile Communications GmbH, Munich former Comneon GmbH acquired by Intel in Jan 2011**<br>**In the following Positions:** |
| Jan 20013 - present | |

**Project Manager Protocol Stack / Cross Functional Team Project Lead**

Core-team member in Intel's Rel11 LTE/3G/2G/TDS modem platform project, during complete project life time for an US customer.
- Project manager of the GSM/UMTS/LTE protocol stack component
- Leading a team of 100+ engineers in India, China, US and Germany.
- Aligning requirements, planning work packages together with line and component leads and track verification.
- Driving early protocol stack SW verification in host environment with early testing leading to a very smooth integration on the target platform.
- Defining, setting up and executing Agile methodologies within the protocol stack organization, using e.g. Scrum, Kanban
- Team project lead of one cross functional teams for 3GPP R11 modem features MDT/SON

Jan 2008 – Dec 2012
- **Project Management for Protocol Stack, Customer Project**
Project manager in three customer projects, for a tier 1 Korean Mobile phone manufacturer, based on 3GPP Rel5, Rel6 and Rel7 platforms, during the complete life cycle.
  - Development and support for verification and maintenance.
  - Alignment and co-ordination with development teams in Korea, India and Germany and the customer
  - Successful management of an AT&T ADAPT verification campaign, using external test resources in external test house.
  - Highly regarded by the customer for support, co-operation and quality of deliveries.
  Project manager in a triple SIM platform project
  - Project delivery in time and budget despite a very challenging schedule.

Dec 2003 – Dec 2007
- **Protocol Stack Project Manager**
  - New host test environment introduction, lead and co-ordination of two teams developing test cases in US and Germany, for reaching quality and coverage goals.
  - Release management, SW delivery and configuration management for UMTS access stratum protocol stack Rel5.
  - Release manager in customer project, where the SW component UMTS access stratum was provided to a European Mobile Phone SW customer.
  - Feature lead for 2G/3G protocol stack features in R99/Rel4 platform project – tracking development and verification
  - Project lead for successful demonstration projects for Infineon's first 3G R99 platform at the GSM world Congress 2003 and 2004. The successful demo led to an engagement with a European mobile phone manufacturer.

| | |
|---|---|
| July 2000 – Nov 2003 | **• Software Developer**<br>○ Protocol Software development in the SW component UMTS access stratum. |
| Jan 1998 – June 2000 | **• Software Developer, Sony International (Europe) GmbH - Munich**<br>○ Development of Data services/AT command support in three SONY mobile phone projects. |
| May 1994 – Dec 1997 | **• Mobile Network Research Engineer, Telia Research AB, Haninge Sweden**<br>○ Engaged mainly in projects aiming to optimize mobile phone radio network.<br>○ Work related to introduction of GSM data services in the Telia Network and participated in ETSI standardization for GSM data services and SMS. |

**Education**

| | |
|---|---|
| 1989 - 1994 | **• Master of Science, Applied Physics and Electro-Technique (telecommunication branch)**<br>The Institute of Technology at Linköping University, |
| 1987 - 1988 | **• Mariannelunds FHS**, **(theology)**<br>Luleå, Sweden |
| 1986 - 1987 | **• Civil Service at Telia (Telephony Network Technician)**<br>Stockholm, Sweden |
| 1982 - 1986 | **• Technical Gymnasium (Electro Technique)**<br>Midskogsskolan, Luleå Sweden |

**Languages**

| | |
|---|---|
| Swedish | Native, Mother tongue |
| English | Full professional working proficiency |
| German | Professional working proficiancy |

**IT-Skills**

- Coding in C
- Proficient in MS Office
- MS Project
- Jama Contour/Rational RequisitePro – Requirements Management
- RTC (Real Time Concert for agile teams)
- Configuration Management tools – Clear Case, GIT
- QlikView
